

■ reDataVault™ for Brokers

The single largest repository of MLS listing data in the U.S.

Put yourself at the controls of listing data management.

From listing syndication to MLS data aggregation, reDataVault™ simplifies management of listing data from several MLSs at once while saving you time and money. Group multiple offices together and syndicate all of your listings to the top trafficked consumer websites, no matter how many MLSs you participate with. Protect and market your brand by adding selective watermarking to all of your listing images. Easily redirect leads back to YOUR own website by managing your own Syndication Website URL.

Take back control of your listing data with these critical options: setup and manage exports of your listings; receive free click-stream listing syndication activity reports; keep all of your data licensing agreements online and organized, and much more!

What Brokers are saying:

“reDataVault is your personal gateway to the world of real estate information (“REI”) – information you can use quickly and easily. As a “Licensee” of real estate information, reDataVault lets you find the MLS data you need.”
